

# Brand new exploit for Qualcomm Snapdragon chipsets

MSAB offers a new exploit for Snapdragon chipsets. This new exploit covers over **124 devices** and we're expanding on that number every day.

We support devices such as Samsung Note 9, S9+ including the S23 and ZFlip5, Xiaomi Black Shark, multiple Vivo devices including the X27 Pro, X27, Z3, X3 and X23, Oppo K3, R17, Pixel 3a, 3a XL, Realme 3 Pro and many more.

At this time, the exploit for Snapdragon chipsets is only offered through our **Access Service** program.

**Need to solve a challenging case involving Snapdragon chipsets?**

➤ Contact us at [services@msab.com](mailto:services@msab.com) with your inquiry and we will promptly respond to your request.

New supported chipsets:

- 665
